

CROPLANDS

Self Propelled Guidance giveaways from Croplands

1st March 2010

For a strictly limited time only Croplands are offering free guidance systems valued at up to \$47,000 on selected RoGator and Spra Coupe models.

For those interested in a larger machine look no further than the RoGator 1386 Self propelled sprayer. With a large stainless steel tank, a newly designed front-entry system, a wide cab entry and optional front reload station the RoGator has the brawn and brains to meet and exceed your application needs year after year.

Only applicable to limited number of the new release 2010 model 1386 RoGators, Croplands are offering farmers the choice of either a Raven or Topcon guidance system which includes: controller, receiver, automatic steering, boom leveller and section control, fitted at no cost to the machine, with a value of up to \$47,000*.

For a lighter weight self propelled sprayer that is durable, dependable and professional and delivers both uniform sprayer speed and spray volume, the Spra Coupe 7000 series machine ticks all the boxes. Spra-Coupes are renowned for their precise and effective application – working at high speeds and applying low volumes – between 50-100 litres/ha. This allows these nimble machines to provide the output and performance required by today's demanding operators.

For a short time the Spra Coupe 7000 series machines will come fitted with Front Wheel assist Options with a retail value of \$26,250 at no extra charge.*

For more information contact Croplands on 1800 999 162 or email sales@croplands.com.au

**Options only available ex factory*
